

The Cosmology of Sound & The Teacher's Craft

Tuning the dimensions of practice through mantra,
awareness, and neuro-resonance

Koshas TTC-300, Uruguay | 18 June 2026 | Satchidananda

The Map So Far: Koshas as a Practical Framework

Three Pillars of the Teacher's Craft

The Teacher's Toolkit: Mapping the Branches

Hatha Yoga	asana, pranayama, shatkarma, mudra, bandha
Karma Yoga	Selfless action, seva
Raja Yoga	pratyahara, dharana, dhyana
Bhakti Yoga	kirtan, japa, working with emotions, Pratipaksha Bhavana (cultivating the opposite emotion)
Kriya Yoga	Kriyas and subtle energy practices
Jnana Yoga	Self-inquiry, the SWAN framework (Strengths, Weaknesses, Ambitions, Needs)

Cultivating Agency: The Pedagogical Shift

Instruction

Telling students what to feel or what to do.
Focuses on obedience and external authority.

Awareness

Returning students to awareness.
Focuses on self-discovery.

Keep returning
the student to:

- 1. Awareness of what is being done.
- 2. Awareness of what is being felt.
- 3. Awareness of one's own witnessing capacity.

The Primordial Origin: Sound as the Architect of Reality

Aboriginal Australian:
The land sung into being
through Songlines / Dreaming.

Maya: Creators speak
the word "Earth," and it
arises (Popol Vuh).

Kabbalah: The world created
through speech and the 22
letters of the alphabet.

Sanātana Dharma: Nāda Brahma
(the world is sound); Parabrahma
ripples as the cosmic Auṃ.

Judeo-Christian: "In the
beginning was the Word";
the Alpha and the Omega.

Ancient Egypt: Ptah
conceives creation in the
heart and speaks it forth
by the tongue.

Islam: The command
fayakūn" — God says
'Be,' and it is.

The Scientific Counterpart: Acoustics Over Optics

Seeing:
Ultrasound & Sonar

Echolocation used by bats, dolphins, and submarines to "see" space through sound rather than light.

Structuring:
Cymatics

Sound frequencies organizing matter into precise geometric patterns (Chladni plates, Hans Jenny).

Transforming:
Sonoluminescence

The phenomenon of sound actually producing bursts of light from collapsing bubbles.

Originating: Baryon
Acoustic Oscillations

The early universe literally rang; cosmologists read these ancient acoustic waves to map the cosmos.

Defining Mantra: Structured Vibration

Mantra is not merely chanting; it is deliberate, structured vibration.

Just as light behaves as both particle and wave, sound (phonons) operates as a physical force. Mantras act as specific algorithms used to intentionally tune the frequency and density of specific koshas.

Core Matrix: Mapping Mantras to the Koshas

MANTRA	TOUCHES	EFFECT
Mahāmṛtyuñjaya	Annamaya + Pranamaya	Builds strong vibration and resilience; strengthens the physical body and vital energy.
Gāyatrī	Manomaya + Vijnanamaya	Illumines the mental body and intuitive intellect ("...prachodayāt").
32 Names of Durgā (Durgā Dvātriṃśat Nāmamālā)	Anandamaya (Causal)	Reaches the cosmic Mother as the very cause of manifest reality.

Synthesis: Field Theory & Neuro-Resonance

1. The Stimulus

Deliberate mantra practice creates deep resonance within the interacting fields of the koshas.

2. Neuro-State Contact

This resonance contacts and embeds within a specific neurological state.

3. Willful Recall

By forming a “memory-resonance inducer,” we learn to willfully recreate that state later.

4. Bypassing the Practice

Eventually, the physical practice can be bypassed entirely, summoning the state from memory alone.

Body, energy, mind, knowing, and bliss are not separate—the cymmomentrati inmecra, struy are unmother separate—they are interacting fields tuned by sound.

The Practitioner's Diagnostic

A

Integrating the layers. Which of your four 'legs' is shortest right now? Which *kosha* is undernourished, and with which *guna* (tamasic, rajasic, sattvic)?

B

An old car relies on nature's emergency alarms; a new car **runs rich internal, intentional automation**. How much **self-sensing** are we running? Are we waiting for the engine to smoke, or are we reading the subtle data early?

Reflection & Inquiry

Where are you running on nature's alarms vs. the intentional alarms you set yourself?

Has a sound, chant, or mantra ever shifted your state faster than a physical practice?

When leading Shantipat, what are you actually looking for in the room to read your students' state?

"High-quality prana"—where in your life or physical spaces do you actually feel it?

Integration & Ecosystem

Session Artifacts

Access NotebookLM audio overviews, full session transcripts, and slide graphics via the portal.

Feedback & Reflection

Please submit your insights via the Google Form linked on the session page.
